More than 1,200 executives, leaders, decision makers on site and more than 1,200 people online via live-stream from more than 90 countries

Results

Statements and recommendations of the National Academies and M8 Alliance to governments and international organizations

The World Health Summit (WHS) was founded in 2009 on the occasion of the 300th anniversary of the Charité. Its mission is to bring together stakeholders and decision makers from all health related fields, i.e. academia, industry, politics, and civil society, to establish a unique and sustainable high-level forum and network. The World Health Summit is designed as an open and democratic forum, promoting thought leadership through academic input into the scientific and global health agenda.

M8 ALLIANCE

The M8 Alliance of Academic Health Centers, Universities and National Academies is a unique collaborative network of academic institutions of educational and research excellence.

Founded in 2009 in parallel to the inaugural World Health Summit, the M8 Alliance is committed to improving health worldwide. Its members provide the strong foundation of excellence on which the World Health Summit is built.
