WORLD HEALTH SUMMIT
BERLIN, GERMANY
OCTOBER 14–16, 2018
“It has a real added value in times when we know that multi-lateral platforms in the world are losing power.”
JOANNE LIU
International President, Médecins Sans Frontières, Switzerland

“The World Health Summit in Berlin is also a forum that is held in high international esteem and is dedicated to jointly furthering global health.”
HERMANN GRÖHE
Federal Minister of Health, Germany

“The World Health Summit is one of the best events to meet and interact with all aspects of global healthcare, academia, government, and pharma.”
THOMAS P. LAUR
President of SAP Health, USA

“I am very excited by the increased attendance of young people from Africa.”
MATSHIDISO REBECCA MOETI
WHO Regional Office for Africa, Switzerland

“The quality of people here, the quality of panels, the quality of discussions, the diversity of everybody has been really amazing.”
HRH PRINCESS DINAH MIRÉ OF JORDAN
President-Elect, Union for International Cancer Control, Switzerland

“This well-known collaborative network of academic institutions works tirelessly to achieve its main goal: to improve the health conditions worldwide.”
ADALBERTO CAMPOS FERNANDES
Minister of Health, Portugal

“No other forum draws the relative participants so systematically into a common discourse aimed at mastering the future challenges of healthcare provision.”
STEFAN OELRICH
Executive Vice President Head of Diabetes and Cardiovascular GBU, Sanofi, Germany

“The World Health Summit is truly a premier strategic forum for global health leaders to come together.”
TEDROS ADHANOM GHEBREYESUS
Director-General, WHO, Switzerland

“It has a real added value in times when we know that multi-lateral platforms in the world are losing power.”
JOANNE LIU
International President, Médecins Sans Frontières, Switzerland

“The World Health Summit brings together experts from across the globe to improve both healthcare and prevention.”
KARL MAX EINHÄUPL
CEO, Charité – Universitätsmedizin Berlin, Germany

“Congratulations. What a great Summit. And all the best for next year’s anniversary.”
FRANCESCO COLOMBO
Head of Health Division, OECD, France

“No other forum draws the relative participants so systematically into a common discourse aimed at mastering the future challenges of healthcare provision.”
STEFAN OELRICH
Executive Vice President Head of Diabetes and Cardiovascular GBU, Sanofi, Germany

“The World Health Summit 2017 was a wonderful event with an extraordinary program and many opportunities for important and fruitful meetings.”
CHRISTOPH BENN
Director of External Relations, The Global Fund to Fight AIDS, Tuberculosis and Malaria, Switzerland

“What a great occasion to engage and talk about how we can jointly tackle some of the most fundamental challenges of our time.”
WERNER BAUMANN
CEO, Bayer AG, Germany
From October 14–16, the 10th World Health Summit will again draw international experts from academia, politics, the private sector, and civil society to Berlin.

At the World Health Summit, 2,000 stakeholders and decisionmakers from 100 countries and every field in healthcare work together to find solutions to global health challenges.

The World Health Summit promotes thought leadership in science and advances global health agendas and was founded in 2009 on the occasion of the 300th anniversary of Berlin’s Charité Hospital. The international conference is traditionally held under the patronage of the German Chancellor, the President of the Republic of France and the President of the European Commission. In addition to the World Health Summit in October in Berlin there are annual Regional Meetings in Spring and Expert Meetings around the world.

Participants
- 2,000 from 100 countries on site
- 3,500 worldwide via live-stream

Goals
- Improve health worldwide
- Bring together stakeholders from all sectors
- Strengthen international cooperation

Results
- M8 Alliance Declaration
- Statements and recommendations for National Academies, Governments and International Organizations
- Session Reports

3 DAYS · 100 NATIONS · 200 SPEAKERS · 2000 PARTICIPANTS

GENERAL TOPICS

- Basic Biological & Medical Research
- Clinical & Patient Research
- Specific Diseases & Disorders
- Diagnostics & Therapy
- Medical Technology & Engineering
- Health Policies & Systems
- Universal Health Coverage
- Translational Science & Medicine
- Public Health & Prevention
- Lifestyle, Physical Activity, Nutrition
- Patient Safety
- Healthcare Facilities
- Drugs & Vaccines
- Regulatory Aspects
- Health Visions, Strategies, Ethics
- Evolutionary Medicine
- Demographic Change & Healthy Aging
- Global Health and Development

PATRONAGE *

ANGELA MERKEL
Chancellor of the Federal Republic of Germany

EMMANUEL MACRON
President of the Republic of France

JEAN-CLAUDE JUNCKER
President of the European Commission

“The World Health Summit has become a well and widely respected international forum when it comes to the joint search for effective responses to global health issues.”

“Cooperation between states, the scientific, economic and medical stakeholders, and civil society is essential and must be planned over the long term.”

“The World Health Summit is a key milestone in our efforts.”

* continuation requested
Pandemic Preparedness
The ability to prevent, detect, respond to and control outbreaks is a significant investment that many countries are still struggling to make. New financing mechanisms – such as the Pandemic Emergency Financing Facility and WHO’s Contingency Fund – are therefore critical to ensuring global health security and saving lives. In this process, domestic financing for preparedness and reliable public health mechanisms poses a key challenge.

The Sustainable Development Goals: Health in All Policies
The SDGs are an indivisible and interdependent set of goals for sustainable development that are inherently linked with the Health in All Policies approach. It provides a tool for finding common ground between economic and social development, environmental sustainability and human health. One of the most important challenges for global health in the coming decade will be to develop synergies between a wide range of SDGs and health.

Access to Essential Medicines
Some countries have made substantial progress towards improving access to essential medicines and treatments for fighting HIV/AIDS, malaria and tuberculosis. Even so, access to essential medicines in many parts of the developing world remains inadequate, and new challenges – like access to NCD medicines – have arisen. Recent progress shows that access to essential medicines can be improved through stronger partnerships between governments, pharmaceutical companies, civil society and individual consumers.

Antimicrobial Resistance
Antimicrobial resistance is rising to dangerously high levels all over the world, and now threatens our ability to treat common infectious diseases. The global crisis reflects the overuse of common antibiotics, as well as a lack of new compound development on the part of pharmaceutical companies to address the challenge. Fresh efforts have been made recently to coordinate efforts, implement new policies and renew research efforts. But major gaps remain.

The Digital Healthcare Revolution
The global population is growing and ageing, and that is having a profound impact on healthcare all over the planet. Meanwhile, new developments in technology are blurring the boundaries between the physical, biological and digital worlds. The goal is now the personalization of medicine – allowing tailored treatments for individual patients based on their unique genetic makeup. This revolution has the potential to provide huge health benefits and empower patients, but it also poses new ethical challenges, and could make inequities in healthcare even starker than they are today.

**SESSION FORMATS**

**Keynotes**
- 90 minutes
- Max. 5 speakers
- Up to 800 participants

**Panel Discussions**
- 90 minutes
- Max. 6 speakers
- Up to 300 participants

**Workshops**
- 90 minutes
- Max. 6 speakers
- Up to 250 participants
3 days, 47 sessions, 250 speakers, and 2,000 participants from about 100 countries – in October 2017, Berlin was the capital of Global Health once more.

“As long as we have people in our world who don’t have access to sustainable health-care systems, diagnostics, higher education institutions, research and developments, etc, there will be a lack of health security and we are all going to be at risk collectively.”

LORD PAUL BOATENG
Member of the House of Lords, United Kingdom

“How do we implement the One Health approach? There is a need to engage more colleagues from more disciplines. We need to build long-term relationships and collaborations; to build trust to change behaviour and reduce infectious behavior.”

CHRISTINE BEERLI
Vice President, International Committee of the Red Cross, Switzerland
When we know the meaning of the Genome sequence we will know the cause and the cure of everything: from disease to aberrant behavior to aging. What more persuasive call to the pursuit of basic medical research can there be?

ROGER D. KORNBERG
Nobel Prize laureate,
Stanford University, USA
HEALTH IS A POLITICAL CHOICE

Global health is increasingly shaped in the political arena. For the first time the heads of state of the G20 included priority global health issues in their final declaration. Health is recognized as a central piece of the Sustainable Development Agenda 2030 and it is now a regular feature at the UN General Assembly. Many regional political bodies are engaging to improve health whilst city initiatives for health are gaining in relevance.

The rich discussions at the World Health Summit 2017 lead us to highlight the need for action in six key areas of global health:

1. **Commitment to Strong and Reliable Governance**

   The world needs strong global health institutions to set norms and standards, respond to outbreaks and to protect and support the most vulnerable. Their work needs the support of decision makers at the highest level and it is essential that health remains a key issue in major political fora such as the G7 and the G20 and in all regional organizations.

   The M8 Alliance calls on the countries hosting the next G7 and G20 summits and holding the presidencies of key regional organizations to include global health challenges on their agendas and to make the political choices required to ensure the implementation of the 2030 SDG agenda.

2. **Commitment to Ensure Global Health Security**

   The world is not yet ready to respond sufficiently to a major pandemic threat, despite a range of new initiatives which have been created to support greater health security for all. Investments in science and innovation as well as in public health institutions and capacity are critical. This requires synergies between national, regional and global action, between public and private actors and between development and humanitarian organizations.

   The M8 Alliance calls on decision makers to maintain and strengthen their investment in health security, especially the implementation of the International Health Regulations. This must include ensuring the safety of health and humanitarian workers in war and conflict zones. Investing in resilient health systems and capacity at community level is one of the best approaches to ensure greater safety and reduce vulnerability.

3. **Commitment to Healthy and Resilient Cities**

   Cities are becoming transformative drivers of sustainable development and key actors in global health. Their challenge is to act for health locally and integrate health into urban planning, housing investment and social policy decisions as cities continue to grow and change. The NCD pandemic will only be resolved if there is also determined action at the city level.

   The M8 Alliances welcomes the increasing number of city initiatives and networks that support health and calls on Mayors to give particular attention to the social determinants of health and their impact on the next generation of children and young people.
4 Commitment to Responsible Approaches to Big Data

Big Data and artificial intelligence can bridge the gap between healthcare delivery and population health and improve many health outcomes through enhanced methods of research. The digital future of health has only just begun and in many cases outpaces the policy responses.

The M8 Alliance calls on international organizations and on policymakers to prioritize the digital potential of health systems and to rapidly and systematically address the ethical, commercial, regulatory and technical challenges that come with this change.

5 Commitment to Research, Innovation and Development

Intensified global efforts to step up vaccine research and development are essential and a range of new initiatives – such as GAVI and CEPI – support the move in this direction. Important initiatives are also emerging to address the challenge of antimicrobial resistance. Part of such an effort must be the support to institution and capacity building in the global South and strong cooperation networks that span the globe.

The M8 Alliance calls on countries, private sector actors and international organizations to significantly step up their investment in innovation, science and technology, including implementation sciences, interdisciplinary and translational work as well as technology transfer.

6 Commitment to Innovation and Health Systems Strengthening in Africa

Achieving the Sustainable Development Goals will require significant innovations regarding how investments and partnerships are developed with low and middle income counties around the world, especially in Africa. Domestic investment will play an ever more important role – yet cooperation among African countries as in other regions of the world will be more important than ever before in order to muster the still scarce resources.

The M8 Alliance calls on professional organizations to actively contribute to new models of institution building and professional development to promote indigenous capacity in science and technology. Strategies to develop a highly competent health workforce, managing work force migration and circulation, involvement of Diasporas of professionals and scientists will gain in relevance. First successes in Africa show that progress is possible – they must be stepped up and supported.

The M8 Alliance renews its full commitment to support goal 3 of the Sustainable Development Goals which aims to: “Ensure healthy lives and promote well-being for all at all ages.” We call on heads of state and government to invest in people and to ensure that no one is left behind. The M8 Alliance commits to the transformative approach of the Sustainable Development Goals. Success in SDG goal 3 will be achieved in a cross-sectoral approach involving many of the other SDGs. We call on politicians to make the political choice for health.
Startups from all over the world presented their ideas and concepts for the future of healthcare at the World Health Summit Startup Track held under the patronage of German Federal Minister of Health Hermann Gröhe.

10 young entrepreneurs from 6 countries pitched on Monday, October 16, in front of a high ranking jury and the audience and were awarded by Minister Hermann Gröhe in a ceremony that same evening.

The winning company doctHERs from Pakistan convinced the jury with their idea of digitally connecting women in low- and middle-income countries to improve access to health. “Our winner combines both a significant impact on health and sets a vital and timely direction for social change,” so the reasoning of the jury. Asher Hasan of doctHERs said: “It’s like winning the Oscars. This visibility will help women all over the world.”

For the World Health Summit Startup Track 2017, more than 70 health startups from 25 countries had applied, 25 of them were invited to the World Health Summit.

World Health Summit Night
Following the award ceremony, participants and speakers enjoyed the World Health Summit Night with food, drinks and music.

Regional Meeting – Iran
April 29–30, 2019
Kish Island

“I would like to welcome you to the University of Coimbra. Founded in 1290, it is one of the oldest universities in Europe and one of very few that has been declared World Heritage by UNESCO.”
JOÃO GABRIEL SILVA
Rector, University of Coimbra, Portugal

“The Regional Meeting in Coimbra will be a very good event to serve the World Health Summit’s vision and to communicate it to many countries especially in Africa.”
FERNANDO REGATEIRO
Chairman of the Board of Directors, Coimbra University Hospitals, Portugal
The World Health Summit supports young experts and innovative ideas:

### STARTUP TRACK

The World Health Summit Startup Track, held under the patronage of the German Federal Minister of Health, highlights innovative ideas from all over the world with the potential to revolutionize healthcare and improve global health. From among all applicants, 25 startups are invited to the World Health Summit, including 10 finalists who pitch their business concepts in front of jury and audience.

### NEW VOICES IN GLOBAL HEALTH

The New Voices in Global Health initiative promotes the active participation of young scientists in the World Health Summit. The World Health Summit Scientific Committee identifies the best applications. Selected participants present their work at the World Health Summit.

### IAP YOUNG PHYSICIAN LEADERS

In this program, top junior professionals are nominated by the National Academies of their countries and being trained in special leadership programs during the World Health Summit. The program is organized by the IAP for Health, the medical section of all National Academies, and was launched in 2011 in partnership with the World Health Summit and the M8 Alliance.

### NEXT GENERATION OF SCIENCE JOURNALISTS AWARD

The Next Generation of Science Journalists Award supports emerging young medical science journalists and their contribution towards public understanding of science. It is held in cooperation with Deutsches Ärzteblatt, the European Union of Science Journalists’ Associations, the Pulitzer Center on Crisis Reporting, and the International Journalists’ Programmes.
The M8 Alliance is a unique network of 25 leading international academic health centers, universities and research institutions, and includes the InterAcademy Partnership, which represents all National Academies of Medicine and Science. The M8 Alliance acts as an academic think-tank for the World Health Summit.

The M8 Alliance currently has 25 members based in 18 different countries, and includes all National Academies of Medicine and Science, represented through the InterAcademy Partnership. All M8 Alliance members are committed to improving global health and working with political and economic decisionmakers to develop science based solutions to health challenges worldwide. The M8 Alliance promotes the bench to bedside to population health translation of research, as well as the transformation of current medical care approaches to treating the ill by creating health-care systems aimed at the effective prevention of disease.

The organization also works to adapt health-related solutions to rapidly changing living conditions through research in priority areas, especially shifting demographics, urbanization, and climate change.
M8 ALLIANCE

InterAcademy Partnership (IAP) for Health
The IAP for Health combines the expertise and impact of all National Academies of Medicine and Science worldwide to advance sound policies, promote excellence in science education and improve public and global health.

Kyoto University Graduate School of Medicine, Japan
The first institution of its kind in Japan, the Kyoto Imperial University College of Medicine was founded in 1899. Its successor, the Kyoto University School of Public Health, was established in 2000.

Charité - Universitätsmedizin Berlin, Germany
Europe's largest university clinic – and its oldest and most prominent hospital – is located in the German capital. Eleven Nobel Prize laureates have worked at the Charité.

Makerere University, Uganda
One of the oldest and most prestigious centers of learning in Africa, Makerere University is home to a staff of over 4,000 and more than 40,000 students.

Coimbra Health, Portugal
Over 700 years old, the University of Coimbra is a keystone of European and global scientific culture, as well as a UNESCO World Heritage Site. Together with the Coimbra Hospital and University Center, it forms Coimbra Health.

Monash University, Australia
As Australia’s largest university – with approximately 60,000 students from over 170 countries – Monash has seven campuses: five in Victoria, one in Malaysia and another in South Africa.

Imperial College London, UK
The Imperial College of Science and Technology was created as a constituent college of the University of London. Fully independent since 2007, the Imperial College London attracts students from more than 100 countries.

National University of Singapore
Founded in 1905, the National University of Singapore today consists of 16 different faculties and schools. Around 37,000 students can be found on its three campuses in Singapore and seven overseas locations.

London School of Hygiene & Tropical Medicine, UK
Founded in 1899, the London School of Hygiene & Tropical Medicine is one of the leading research-focused graduate schools in the world.

National Taiwan University, Taiwan
Known for its diverse and international curriculum, National Taiwan University is made up of 11 colleges, 54 departments and 105 graduate institutes. It has a student body of around 30,000.

Istanbul University, Turkey
With origins dating back to 1453, Istanbul University is an internationally recognized institute of higher learning with over 170,000 students and 22 faculties dedicated to research and education.

Sapienza University of Rome, Italy
Established in 1303 by Pope Boniface VIII, Sapienza is one of the oldest universities in the world. With about 115,000 students, it’s one of the largest in Europe as well.

Johns Hopkins Bloomberg School of Public Health, USA
A fully accredited private institution, the JHSPH was the first public health facility in the world, and it remains the largest school in the field.

Tehran University of Medical Sciences, Iran
The university is the oldest, largest and most highly ranked comprehensive higher education institute in the field of medicine and public health in Iran, offering a wide range of courses and receiving applications from students from around the globe.
