WORLD HEALTH SUMMIT
BERLIN, GERMANY
AND DIGITAL
OCTOBER 25–27, 2020

SCIENCE · INNOVATION · POLICIES
“During our EU-Presidency in 2020 together with our trio partners Portugal and Slovenia, we want to make the European voice in global health heard.”

JENS SPAHN
Minister of Health, Germany

“We cannot face gender issues without including diverse identities.”

EPSY CAMPBELL BAR
Vice President, Costa Rica

“Healing and affordability of health products is key. Prioritizing low- and middle-income countries when innovations are brought to the market is an important aspect of how industry can address this.”

JAYASREE IYER
Executive Director, Access to Medicine Foundation

“For us to achieve universal health coverage, we need to strengthen primary healthcare. Two aspects need to be addressed: infrastructure, which is failing for primary healthcare, as well as strengthening community knowledge and action.”

JANE RUTH ACENG
Minister of Health, Uganda

“Universal health coverage must become a political priority. Universal means universal. It speaks to all people having this right, all people having access to health services.”

CARISSA F. ETIENNE
Director, PAHO

“We don’t think we want to live in a world where we finally have cures for all diseases, but they’re unaffordable.”

SOUMYA SWAMINATHAN
Chief Scientist, WHO

“As an optimist who believes in the value of multilateral problem solving, it is delighting for me to join experts from all over the world to talk about how digital technology helps us improve access to better healthcare.”

BERND MONTAG
President and CEO, Siemens Healthineers AG

“Support multilateralism, support women and support global consensus. It’s important for humanity.”

MARGRET CHAN
President, Boao Forum for Asia WHO Emeritus Director-General

“Availability and affordability of health products is key. Prioritizing low- and middle-income countries when innovations are brought to the market is an important aspect of how industry can address this.”

JAYASREE IYER
Executive Director, Access to Medicine Foundation

“I don’t think we want to live in a world where we finally have cures for all diseases, but they’re unaffordable.”

SOUMYA SWAMINATHAN
Chief Scientist, WHO

“For us to achieve universal health coverage, we need to strengthen primary healthcare. Two aspects need to be addressed: infrastructure, which is failing for primary healthcare, as well as strengthening community knowledge and action.”

JANE RUTH ACENG
Minister of Health, Uganda

“Bringing together scientific advancement with innovation—and making sure those two things fit into societies—will be absolutely critical.”

JEREMY FARRAR
Director, Wellcome Trust

“Good software technologies have the potential to democratize health-care, because they can be made available to everyone.”

CHRISTOF VON KALLE
Chair for Clinical Translational Sciences, Berlin Institute of Health

“World Health Summit takeaways: Expanding access to vaccines is an important step in protecting both individuals and entire communities, contributing to more sustainable health care systems.”

DAVID LOEW
Executive Vice President, Sanofi Pasteur

Leadership 21
The World Health Summit is one of the world’s leading strategic forums for global health. Held annually in Berlin, it brings together leaders from politics, science and medicine, the private sector, and civil society to set the agenda for a healthier future. The World Health Summit was founded in 2009, on the occasion of the 300th anniversary of Charité.

**Goals**
- Improving health worldwide
- Bringing together stakeholders from all sectors
- Facilitating constructive exchange in an environment of academic freedom
- Finding answers to major health challenges
- Making recommendations and setting health agendas

**Speakers und Participants**
- Leading scientists and medical professionals
- Ministers and civil servants
- High-ranking officials at international organizations
- CEOs from industry and civil society
- Young professionals and students

**Results**
- M8 Alliance Declaration
- Statements and recommendations for national academies, governments and international organizations
- Session reports

**Patrons**
The World Health Summit is traditionally held under the patronage of:
- Chancellor of the Federal Republic of Germany
- President of the French Republic
- President of the European Commission
- Director-General of the World Health Organization (WHO)

**M8 Alliance**
The M8 Alliance of Academic Health Centers, Universities and National Academies is the academic foundation of the World Health Summit. It is a growing network and currently consists of 28 members in 19 countries, including the InterAcademy Partnership, which represents the national academies of medicine and science in 130 countries. The International Presidency of the World Health Summit rotates annually among members of the M8 Alliance. As a result of each World Health Summit the M8 Alliance issues the M8 Alliance Declaration. The M8 Alliance organizes annual Regional Meetings, regular Expert Meetings, and Summer Schools.

**3 DAYS · 50 SESSIONS · 100 NATIONS · 300 SPEAKERS · 2,500 PARTICIPANTS**

**GENERAL TOPICS**

- Basic Biological & Medical Research
- Clinical & Patient Research
- Specific Diseases & Disorders
- Diagnostics & Therapy
- Medical Technology & Engineering
- Health Policies & Systems
- Universal Health Coverage
- Translational Science & Medicine
- Public Health & Prevention
- Lifestyle, Physical Activity & Nutrition
- Patient Safety
- Healthcare Facilities
- Drugs & Vaccines
- Regulatory Aspects
- Health Visions, Strategies & Ethics
- Evolutionary Medicine
- Demographic Change & Healthy Aging
- Global Health & Development

**SESSION FORMATS**

**Keynotes**
- 90 minutes
- Max. 5 speakers
- Up to 800 participants

**Panel Discussions**
- 90 minutes
- Max. 6 speakers
- Up to 300 participants

**Workshops**
- 90 minutes
- Max. 6 speakers
- Up to 150 participants
The spread of COVID-19 shows how essential the improvement of global health is and how crucial the strengthening of international and interdisciplinary cooperation is. As a leading global health conference and network of academia, the private sector, civil society and politics, the World Health Summit is more important than ever.

The World Health Summit 2020 will take place as planned from 25–27 October in Berlin with a mixture of personal on-site and digital participation. Date, venue, program structure, and session formats will stay the same—participation will be possible in person on-site and remote via internet.

**PATRONS 2020**

**ANGELA MERKEL**
Chancellor of the Federal Republic of Germany

**EMMANUEL MACRON**
President of the French Republic

**URSULA VON DER LEYEN**
President of the European Commission

**TEDROS ADHANOM GHEBREYESUS**
Director-General of the World Health Organization

**PRESIDENTS 2020**

**CHARLES IBINGIRA**
Makerere University, Kampala, Uganda

**DETLEV GANTEN**
Charité - Universitätsmedizin Berlin, Germany

**REGIONAL MEETINGS 2020-2022**
New Dates due to the COVID-19 Pandemic

2021, June 27-30
Kampala, Uganda

2022
Rome, Italy

**EXPERT MEETING 2020**
Rome, Italy
(Postponed due to the COVID-19 Pandemic)

**CENTRAL TOPICS 2020**

• Pandemic Preparedness in the Age of COVID-19: Global Cooperation not Competition
• Strengthening the Role of the European Union in Global Health
• Climate Change and Health: Risks and Responses
• Partnership for the Goals: United Nations’ 75th Anniversary.
• Accelerating the SDG3 Global Action Plan for Health and Well-Being
• Translational Research: Advancing Innovative Treatments
• Digital Health & AI for Pandemic Preparedness
LOOK BACK:
WORLD HEALTH SUMMIT 2019

FACTS

• 2,500 Participants On-Site
• 320 Speakers
• 60 CEOs and Presidents

• 20 International Ministers
• 5 VIP Lunches and Dinners
• 2 Press Conferences

PATRONS

“Diseases and epidemics do not stop at national borders. Responsibility for healthcare thus does not end there either. The World Health Summit plays a key role in living up to this responsibility. As patron of the Summit, I am profoundly grateful to all those who play a part in its success, as the event focuses on new and better prospects for the lives of people all over the world.”

ANGELA MERKEL
Chancellor of the Federal Republic of Germany

“SDGs for health are not concerns for states alone. They are common goals, and the World Health Summit is an opportunity to share this energy for action. Let us be actively optimistic for a healthier future.”

EMMANUEL MACRON
President of the French Republic

“We, as institutions and politicians, call for growth, jobs and opportunities. But we shall be judged by how we treat our people. Because it is the health of all our citizens that is the true mark of our progress as a society. It has been an honour during my mandate as President of the European Commission to offer my patronage to the World Health Summit, a distinguished forum that acts for the greater good.”

JEAN-CLAUDE JUNCKER
President of the European Commission (until 2019)

“WHO is delighted to strengthen its collaboration with the World Health Summit, which is now one of the foremost gatherings in global health. It brings together heads of state, ministers from different sectors, Nobel prize winners, leading CEOs, academics, foundations and civil society. It recognizes the voices of youth and women and aims to increase the diversity that successful global health action requires.”

TEDROS ADHANOM GHEBREYESUS
Director-General of the World Health Organization (WHO)
“We have to intensify our efforts, embrace true commitment to global health, and work in partnership across all sectors and stakeholder groups.”

JENS SPAHN
Minister of Health, Germany

16 Keynotes,
Panel Discussions
and Workshops, e.g.:

• Gender Equality
• Antimicrobial Resistance
• The Role of AI in Healthcare Innovation
• Securing Political Leadership for Global Health
• Protecting the Mental Health of Refugees and Migrants
• Sustainability of Healthcare Systems

WORLD HEALTH SUMMIT 2019
Without a healthy planet with a stable climate, there can be no healthy lives for the people on it. This crisis brings with it a huge opportunity: Many of the measures to limit climate change are also good for our health in the short-term.

SABINE GABRYSCH
Professor for Climate Change and Health, Charité and PIK

20 Keynotes, Panel Discussions and Workshops, e.g.:

- Transforming Human Capital
- Focus Africa
- Universal Health Coverage
- Climate Change and Public Health
- Access to Medicines
- The SDG3 Global Action Plan for Health and Well-Being
TUESDAY, OCTOBER 29

As outlined in a memorandum of understanding, the World Health Organization and Charité will continue working together to accelerate progress in health-related Sustainable Development Goals by promoting and supporting WHO’s five-year strategic plan during the World Health Summit. As part of the collaboration, the World Health Summit will serve as a platform to provide annual updates on the Global Action Plan for Healthy Lives and Well-Being for All, an initiative of 12 leading international agencies to coordinate their activities to improve global health and meet health-related SDG targets.

“Health is a human right, but it’s a right that must be realized through political choice. I believe we are living at a time of unprecedented political commitment for health. There has never been a better opportunity to work together to transform the health of billions of people.”

TEDROS ABDANOM GHEBREYESUS
Director-General, WHO

15 Keynotes, Panel Discussions and Workshops, e.g.:

• Health is a Political Choice
• The SDG3 Global Action Plan for Health and Wellbeing
• Global Public Health Security
• Digital Health
• Climate Change and Health
• Health Data as a Global Public Good
• Access to Sustainable NCD Treatment and Care

“Just let’s say that we have a declaration...”

WWW.WORLDHEALTHSUMMIT.ORG
ACTION ON GLOBAL HEALTH, UNIVERSAL HEALTH COVERAGE, AND CLIMATE CANNOT BE SEPARATED

2019 saw a range of important political steps towards the strengthening of global health. Two high-level meetings at the United Nations General Assembly—one on climate change and one on universal health coverage—reiterated the need for bold global health action. The G7 and the G20 both reinforced the need to invest in health, with the G7 leading the replenishment of the Global Fund and the G20 organizing the first joint meeting between health and finance ministers. Gender equity gained increasing attention and political support, but sexual and reproductive health and rights as well as the health of refugees and migrants continue to split the international community. The rise of populism has led to reduced support for UN organizations and the distrust of governments is complemented by a distrust of experts—also in health. The World Health Summit will continue to be a strong voice for multilateralism, science and equity. (...) it sends a strong message that all stakeholders need to cooperate across nations and sectors to integrate and apply scientific knowledge to ensure a healthier and safer world and achieve the Sustainable Development Goals.

Three issues have been prioritized at the World Health Summit:

1. Climate change is one of the defining issues of our time. It is also one of the world's most urgent health threats. The health of people is directly affected by climate change. For example, 7 million people die every year of conditions related to air pollution. How global health can contribute to tackling the health impacts of climate change and help to identify solutions was one of the key issues discussed at the 2019 World Health Summit. Special focus was given to the two health commitments from the U.N. Climate Action Summit: to save lives by cutting carbon emissions and cleaning our air; and boosting investments in climate action, public health and sustainable development since low-income countries will have most difficulty adapting to climate change and related health hazards.

The M8 calls for concrete actions from governments, investors, development banks and funds, bilateral agencies, NGOs, and the private sector and joins the voice of young people all over the world who are challenging politicians to respond to science and implement determined policies. It calls on health professionals to act by tackling non-communicable diseases and climate change by promoting healthy food and agriculture and cities that are pedestrian friendly; by addressing the substantial carbon emissions of the health sector and by advocating for divestment from fossil fuel and tobacco.
Universal health coverage (UHC) will be key to the achievement of the Sustainable Development Goals. But currently, at least half of the people in the world do not receive the health services they need. About 100 million people are pushed into extreme poverty each year because of out-of-pocket spending on health. This pressing global health issue was addressed in September 2019 by world leaders in the most comprehensive set of health commitments ever adopted at this level. The high-level United Nations political declaration on UHC is a commitment that aims for all people to have access to the health services they need, when and where they need them, without financial hardship. This includes the full range of essential health services, from health promotion to prevention, treatment, rehabilitation, and palliative care.

The M8 calls for determined political action to implement the commitments made specially to ensure equity in UHC so that no one suffers financial hardship because they have had to pay for healthcare and access to medicines out of their own pockets. The M8 considers primary health care to be the cornerstone of UHC and recognizes the fundamental importance of input and co-ownership from and by people, communities, and civil society for their achievement. In addition to the HLM political declaration the M8 underlines that access to health services for refugees and migrants as agreed in the global compact for migration is essential and that gender equality and women’s rights (including SRHR) are foundational principles for UHC.

Digital transformation is changing health and health services in a profound way at rapid speed integrating digital technology in all aspects of health and care, but with great inequalities between countries and population groups.

A flow of data ranging from health care records and contextual information, to wearables to the Internet of Things is transforming the interaction of patients, health care teams and organizations independent of time and place. Deep learning and artificial intelligence can support communication, diagnosis, image analysis, nursing, surgery and workflow. The current and future convergence of big health data—from personal, clinical, and environmental—combined with artificial intelligence (AI) offers unprecedented opportunities for public health. It also requires new ways to protect populations against the increasingly sophisticated collection and misuse of personal data. Applying these developments to address the health needs of LMIC in the context of UHC and primary health care must be a priority. The purpose of digital health must be to promote healthy lives and well-being for everyone, everywhere, at all ages.

The M8 welcomes the development of a digital health strategy by the WHO as global cooperation is critical. It underlines that digital health must be people not technology driven and must be a means of promoting equitable, affordable and universal access to health for all, including the special needs of groups that are vulnerable in the context of digital health. It sees the need for robust ethical guidelines for AI to counteract loss of privacy and inappropriate surveillance and the need for international, evidence based, standards of practice. It calls for a global regulatory environment for health data to become a global public good to counteract the use of health data for commercial gain, and in the worst case, for malicious purposes.

The rich discussions at the World Health Summit 2019 among ministers, foundations, academia, private sector and civil society reinforce the role of the World Health Summit as a meeting place that makes a difference.

BY THE NUMBERS

- 100+ journalists attending
- 400+ mentions:
  - 180+ news articles (print, online, TV, radio),
  - 110+ press releases and reports by speaker/partner-organizations
- 15 press releases
- Press mailing list with over 2,000 German and international media contacts
- Newsletter: 20,000 subscribers
- Web Traffic: 80,000 visitors from 190+ countries and 250,000+ pageviews
- Livestream: 1,000+ views from 45 countries across six continents
- Twitter: 9,000 followers
- Facebook: 9,500 followers
- LinkedIn: 1,700 followers

PRESS EVENTS

- Press conference on “Climate change as the greatest health threat of our time”.
  - The impact of climate change on health was featured in more than 40 news articles covering the summit.
- Guest press event on “AI in health care” by EIT Health.
The World Health Summit supports young experts and innovative ideas.

ENTREPRENEURS IN GLOBAL HEALTH

The initiative Entrepreneurs in Global Health highlights innovative ideas from all over the world with the potential to revolutionize healthcare and improve global health. Selected startups are invited to the World Health Summit to present their ideas in front of an audience.

In partnership with:

NEW VOICES IN GLOBAL HEALTH

The initiative New Voices in Global Health promotes the active participation of talented young researchers at the World Health Summit. Early-career scientists are selected by the Global Young Academy to present their work.

IAP YOUNG PHYSICIAN LEADERS

In this program, top junior professionals are nominated by the national academies of their countries and are trained in special leadership programs during the World Health Summit. The program is organized by the InterAcademy Partnership (IAP), and was launched in 2011 in partnership with the World Health Summit and the M8 Alliance.
The World Health Summit has been working with various organizations, including:

- Access to Medicine Foundation
- Association of Research-Based Pharmaceutical Companies (vfa)
- Charité – Universitätsmedizin Berlin
- Bayer Foundations
- Berlin Institute of Health (BIH)
- Bill & Melinda Gates Foundation
- Coalition for Epidemic Preparedness Innovations (CEPI)

World Health Summit
Regional Meeting – Uganda
June, 27–30, 2021
Kampala

HOSTS
Makerere University in partnership with the Government of Uganda

VENUE
Speke Resort Munyonyo

TOPICS
• The Health of the African Youth
• Advancing Technology for Health in Africa
• Infectious Diseases and Global Health Security
• Stemming the Tide of Non-Communicable Diseases in Low- and Middle-Income Countries
• Inter-sectoral Action for Health

“We are extremely delighted to be leading the preparations for the World Health Summit Regional Meeting, the first ever to be hosted on African soil. With health professionals and other stakeholders in government and the private sector coming together, I’m optimistic that the meeting will stir us all to think better and work harder to achieve the Sustainable Development Goals, all of which pertain to health, whether directly or indirectly.”

CHARLES IBINGIRA
Principal of the College of Health Sciences at Makerere University and International President of the World Health Summit 2020

Makerere is Uganda’s largest and oldest institution (circa 1922) of higher learning and one of Africa’s best. Composed of nine colleges and one school, Makerere offers 284 programs to about 36,000 undergraduates and 4,000 postgraduates and has remained a center of academic excellence for the past 90 years.

Makerere University College of Health Sciences (MakCHS) is the leading medical research center in the region with four schools: Public Health, Bio-Medical Sciences, Medicine, and Health Sciences, offering 23 degree programs and graduating 600 health professionals annually. A key institution in both infectious and non-communicable diseases, MakCHS has made tremendous contribution to science globally over the years with key breakthroughs that have contributed to WHO treatment guidelines.

“As the government, we pledge total support to this important event that has since 2009 done much to ensure that the health of the global community is improved.”

RT. HON RUHAKANA RUGUNDA
Prime Minister of Uganda

“This is a great opportunity for the world to focus on Africa’s health, learn from its successes, and lay strategies for future collaborations.”

JANE RUTH ACENG
Minister of Health, Uganda
The M8 Alliance is the academic foundation of the World Health Summit. A unique network of 28 leading international academic health centers, universities, and research institutions from 19 countries, it includes the InterAcademy partnership, which represents all national academies of medicine and science.

All M8 Alliance members are committed to improving global health and working with political and economic decision-makers to develop science-based solutions to health challenges worldwide.

In addition to the annual World Health Summit in October in Berlin, the M8 Alliance organizes annual Regional Meetings, regular Expert Meetings, and Summer Schools in different parts of the world.

InterAcademy Partnership (IAP)
The IAP combines the expertise and impact of all national academies of medicine and science worldwide to advance sound policies, promote excellence in science education, and improve public and global health.

Charité – Universitätsmedizin Berlin, Germany
Europe’s largest university clinic – and its oldest and most prominent hospital – is located in the German capital. Eleven Nobel Laureates have worked at Charité.

Coimbra Health, Portugal
Over 700 years old, the University of Coimbra is a keystone of European and global scientific culture, as well as a UNESCO World Heritage Site. Together with the Coimbra Hospital and University Center, it forms Coimbra Health.

Geneva University Hospitals, Switzerland
The Geneva University Hospitals are heirs to a centuries-long tradition of excellence in medicine and science. The HUG represents a merger of all public hospitals in Geneva.

Graduate Institute Geneva, Switzerland
A semi-private postgraduate institution, the Graduate Institute Geneva was the first university in the world to be dedicated solely to the study of international affairs.

Imperial College London, UK
The Imperial College of Science and Technology was created as a constituent college of the University of London. Fully independent since 2007, the Imperial College London attracts students from more than 100 countries.

Istanbul University, Turkey
With origins dating back to 1453, Istanbul University is an internationally recognized institute of higher learning with over 170,000 students and 22 faculties dedicated to research and education.

Johns Hopkins Bloomberg School of Public Health, USA
A fully accredited private institution, the JHSPH was the first public health facility in the world, and it remains the largest school in the field.

Karolinska Institute, Sweden
Karolinska Institute is Sweden’s largest medical academic research center and one of the world’s foremost medical universities. It is home to the assembly that selects Nobel laureates in physiology or medicine.

Kyoto University Graduate School of Medicine, Japan
The first institution of its kind in Japan, the Kyoto Imperial University College of Medicine was founded in 1899. Its successor, the Kyoto University School of Public Health, was established in 2000.

London School of Hygiene & Tropical Medicine, UK
Founded in 1899, the London School of Hygiene & Tropical Medicine is one of the leading research-focused graduate schools in the world.

Makerere University, Uganda
One of the oldest and most prestigious centers of learning in Africa, Makerere University is home to a staff of over 4,000 and more than 40,000 students.

Milken Institute School of Public Health
The Milken Institute School of Public Health at George Washington University was established in 1997 and is the only school of public health in Washington, DC.

Monash University, Australia
As Australia’s largest university – with approximately 60,000 students from over 170 countries – Monash has seven campuses: five in Victoria, one in Malaysia and another in South Africa.

“This week, major global health actors will meet at the World Health Summit in Berlin.”
FRANKFURTER ALLGEMEINE ZEITUNG, GERMANY

“This opportunity live a healthy life—or at least in an environment where that is possible—is a human right. That was one of the key statements made at the World Health Summit in Berlin.”
ZDF HEUTE JOURNAL, GERMANY

“A meeting that aims to bring together actors who play an important role in global health, in both poor and rich countries, to pursue agreements that improve the health of populations.”
RADIO FRANCE INTERNATIONALE, FRANCE

World Health Summit 2020
October 25–27
Kosmos
Karl-Marx-Allee 131a
10243 Berlin, Germany
& Digital, via Internet
